Harm Beens
H3 Generator Works

THANK YOU

I formally dealt with Generator Works in 2013, after we have purchased a Chinese generator that never worked when it needed to. After many enquiries in the trade, numerous people directed us to Generator Works and that was my first interaction with the father-and-son Power Team. I was initially sceptical when i was told that the generator they would supply us would be a built-up combination unit of European and Chinese components, taking the best of Europe and China and combining them, but after the good feeling i had after my conversation with Harm Junior and Senior I ordered my first 250kva generator.

Since delivery and installation of our generator, i have finally experienced what's its like to own a generator that works when its meant to. We have never had a single problem since installation. Generator works arrives to service the unit, affordably and on time always delivering a great product with a smile.

We have since purcased 2 more generators, another for our factory (300kva) and a beautiful compact unit for our home. I always recommend Generator works when anyone is looking for a good generator at a good price with great back up service.

Thank you for making our painful situation of loadshedding in South Africa as nice as it possible can be!

A handwritten signature in grey ink, appearing to read "Mariam Cassim".
